

SECONDARY CONDITIONS

When a Tonal Shift is present, it obstructs the spinal nerves, spinal cord and most importantly the brain. Obstruction causes decreased function of the nervous system which leads to dysfunction, disorder and dis-ease in the body, presenting as symptoms or secondary conditions. The reason they are referred to as Secondary conditions is because they are the direct result of the true underlying cause of dis-ease within the body- a Tonal Shift.

Below are some of the most common secondary conditions for which people seek our help...

Acid Reflux	Digestive Disorders	Neck Pain
ADD/ADHD	Frequent Colds	Numbness
Allergies	Headaches	Otitis Media (Ear infection)
Asthma	Herniated Disc	Sciatica
Athletic injuries	High Blood Pressure	Scoliosis
Back Pain	Decreased Immune Function	Seizure Disorders
Bed Wetting	Infertility	Sensory Processing Disorder
Breastfeeding issues	Insomnia	Sinus Problems
Breech Baby	Learning Disorders	TMJ
Chronic Fatigue	Low Back pain	Torticollis
Colic	Menstrual Disorders	Vertigo
Cranial Issues	Migraine Headaches	Whiplash
Depression	Multiple Sclerosis	

It is important to point out that chiropractic is NOT a treatment for any disease or condition. The purpose is to restore normal nervous system function. By removing the obstruction to the nervous system the body is able to fully express the innate intelligence that heals.
